K6PV/6 Activates Santa Catalina Island, IOTA NA-066!

Feb 26 – 28, 2010

Or, What's the worst that can happen, a Tsunami?!?

The Intrepid K6PV/6 IOTA Team...

Ray N6HE

Jeff K6JW

Joe NZ6L

Bob AB6SY

Bill KG6WVF

Don KD6UMC

Ginger KG6TAU

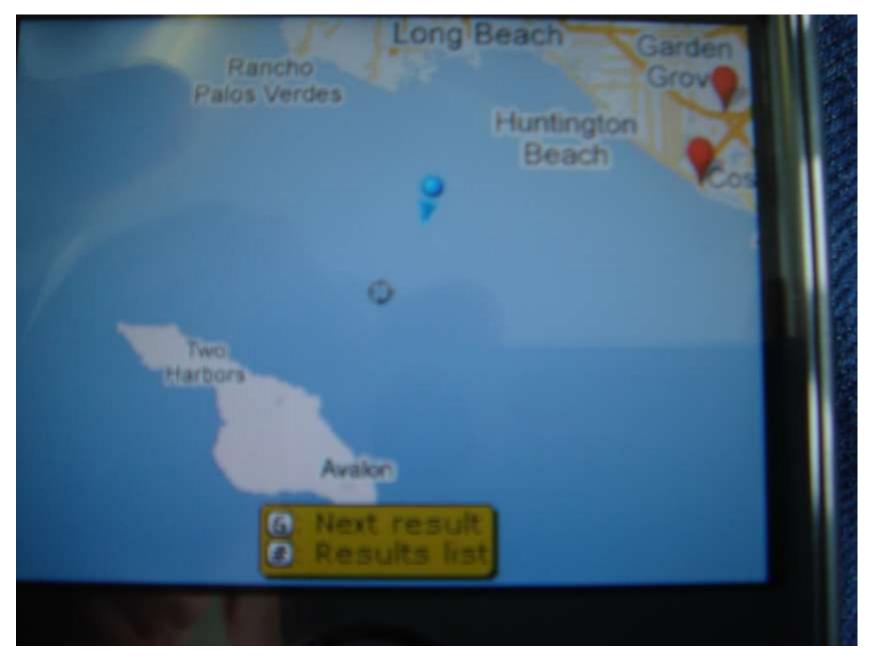

The K6PV/6 IOTA team gathers in Long Beach at the Catalina Express terminal

... and does some last-minute planning...

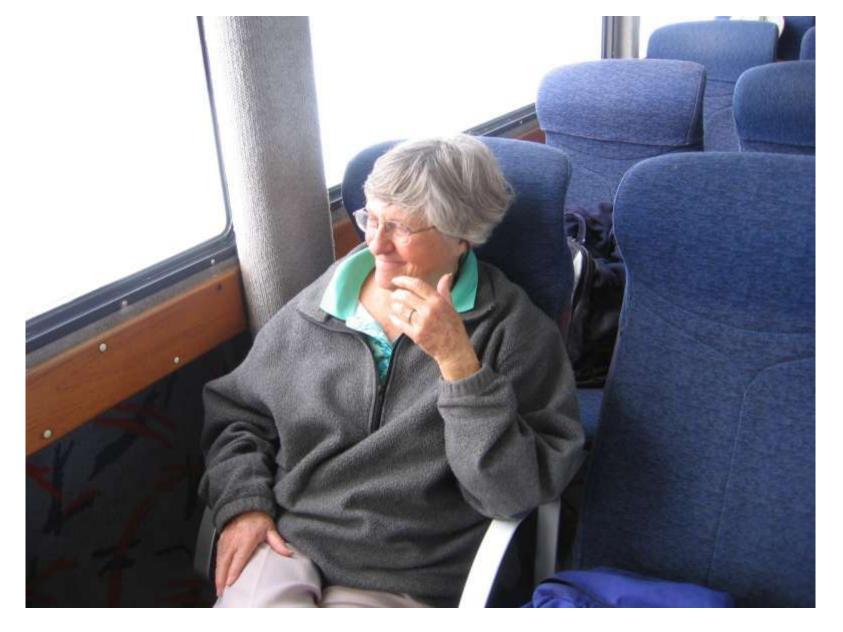

We set out for "Santa Catalina, 26 miles across the sea".....

Joe's cell phone's GPS tracks us along the route to Catalina

Look! A whale! A whale!

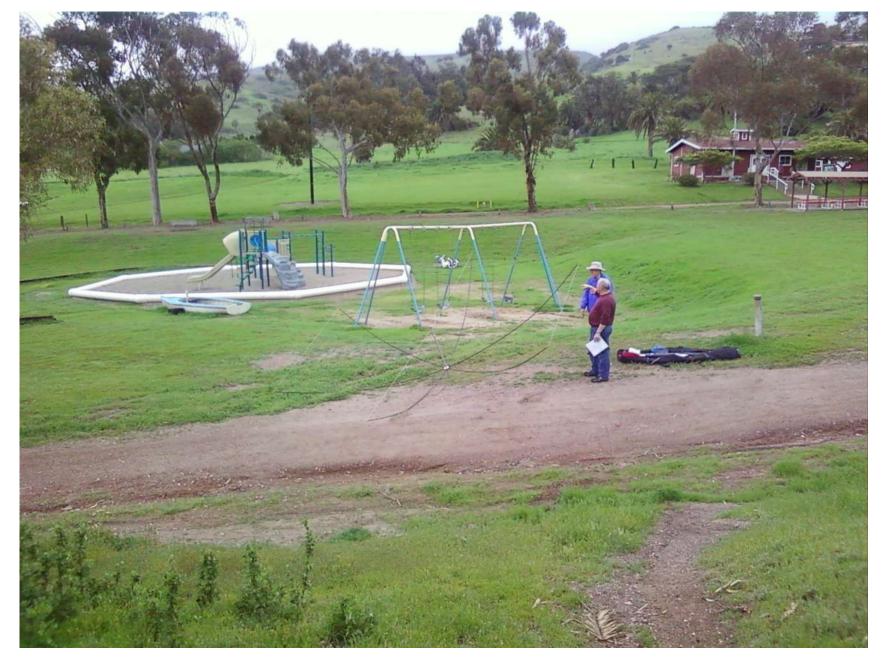

Ginger, KG6TAU, our Master Food Provider, travels over with us, but must return to long Beach...

We approach Two Harbors – will we beat the rain?

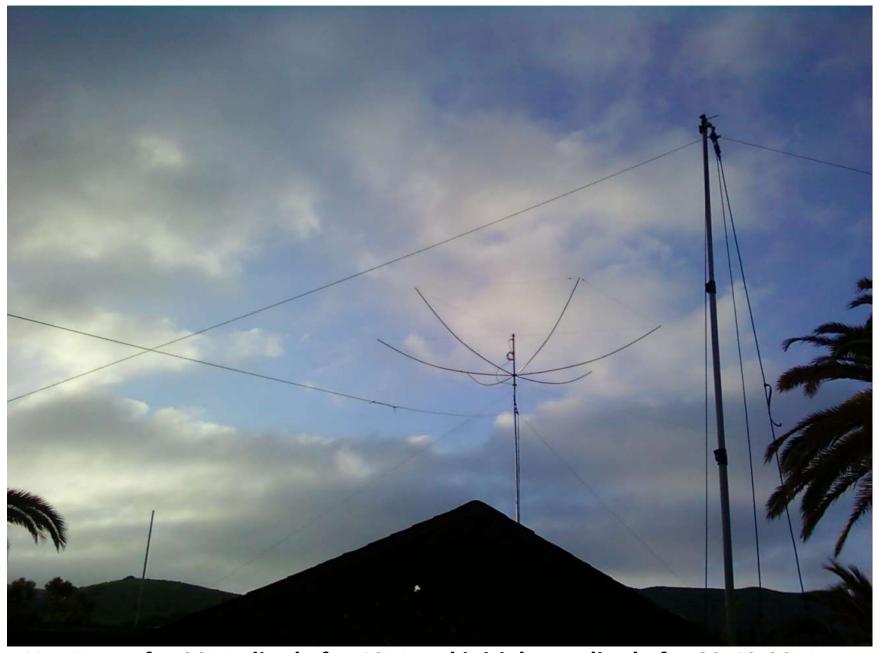

Well, Mel said everything would be in this here bag......

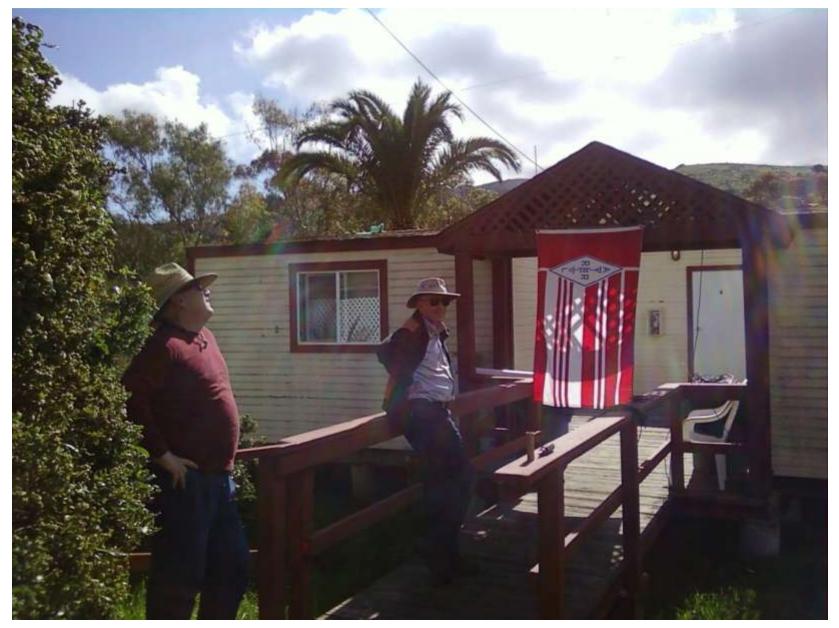

The 20M Hex Beam starts to take shape

Mr. Buffalo visits us – and scratches himself on a pole

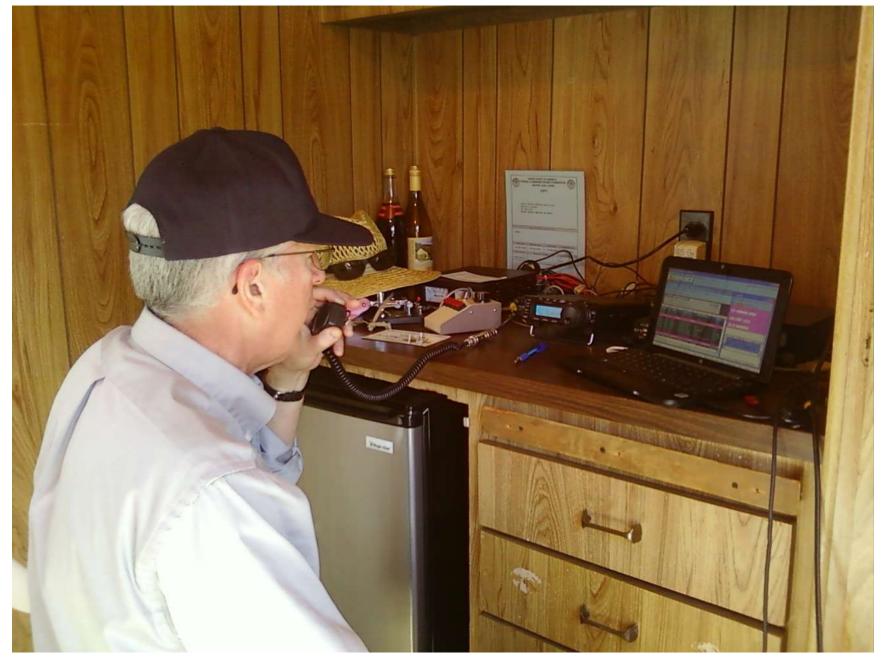

Hex Beam for 20M, dipole for 40M and initial trap dipole for 80-40-20M

Bob and Jeff admire the antennas – wonder if they'll stay up in the wind? If the Hex Beam comes down, Mel and Doris will KILL us!

Joe, "Da Prez" of PVARC, proudly hangs our K6PV Banner

Jeff tests out his Yaesu FT-857 on 20M

Ray with his Ten-Tec Omni VII starts on CW

It was a little cold on the first night

Dinnertime, courtesy of Ginger – notice 2 wine bottles and only 1 bag of food...

Life is good...the bands are open, the coffee is hot, and food is coming!

Jeff and Joe fire up first on 20M

The "Bob and Ray Show" comes on line next

Bob on 20M SSB

Doris' Hex Beam in all its glory – up about 35 feet

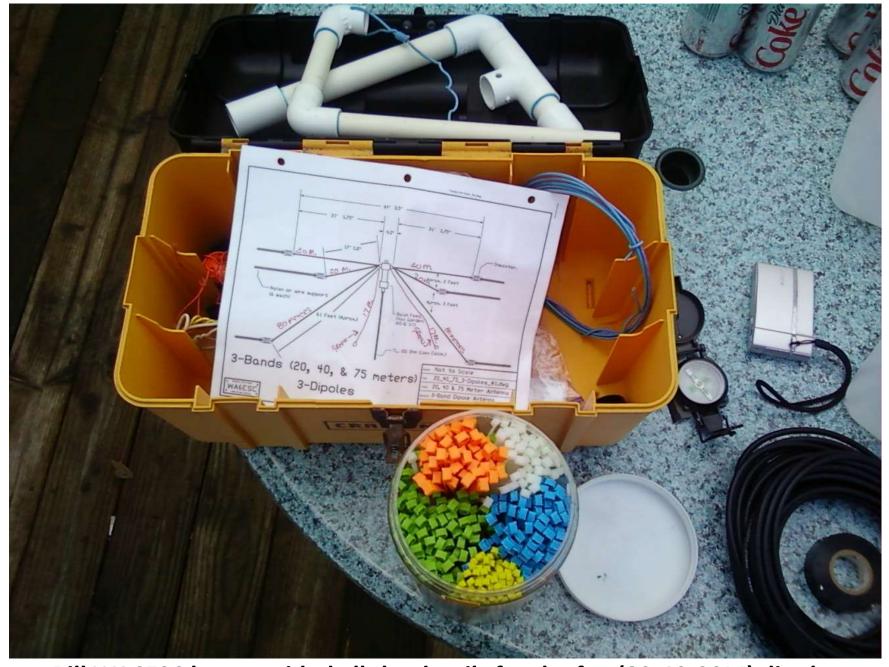

More antennas go up - and Bob runs his business at the same time

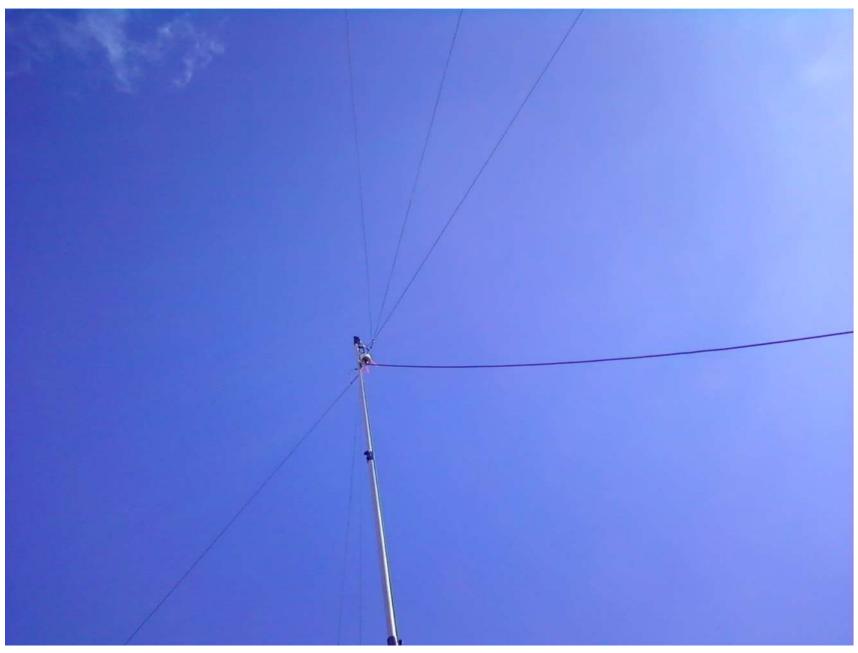

How did the locals know we were the "radio guys?"

We take down the trap dipole and get ready to put up the WA6ESC fan dipole

Bill WA6ESC has provided all the details for the fan (80-40-20M) dipole

The 80-40-20M fan dipole in all its glory

WA6ESC's fan dipole closeup – up 25 feet

We "lengthen" the 40M legs to tune well on CW/RTTY

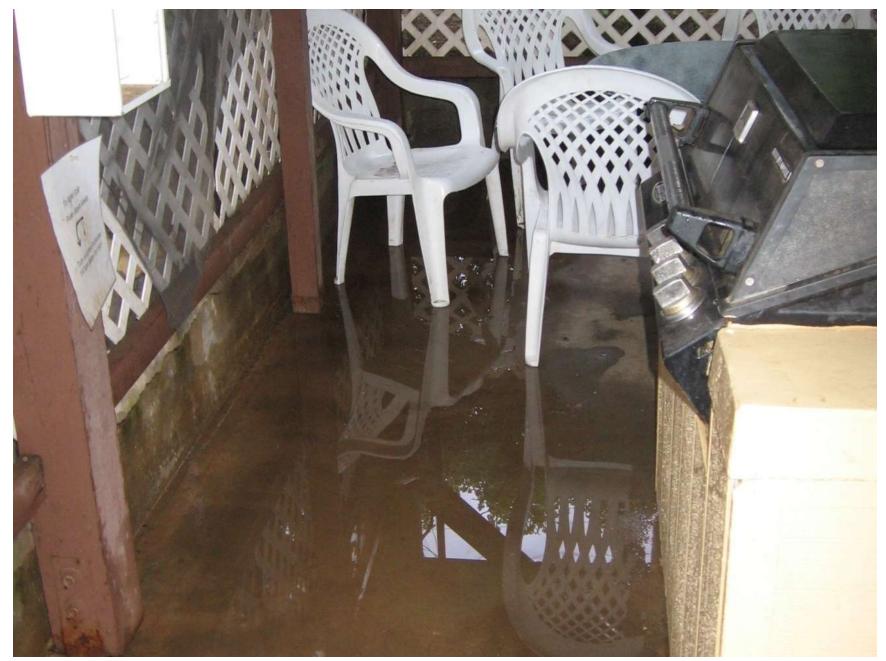

And the 80M dipole needs a bit more length, too... at least the palm tree didn't catch fire!

Chef Joe works on the Beef Stroganoff

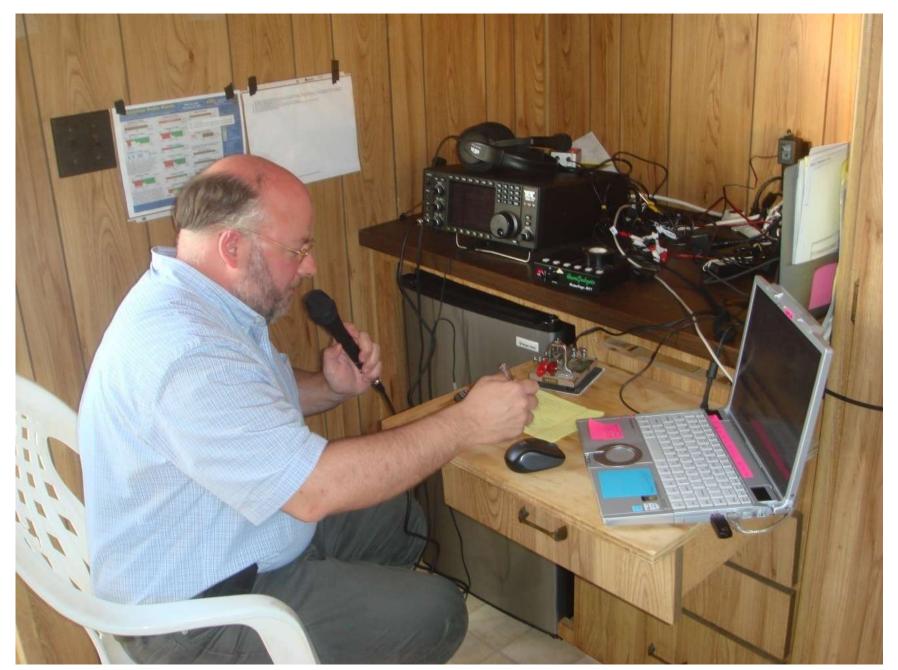

Don comes back from fishing – look what he caught!

Hmmmmm... looks like it rained a bit last night

OMG, is that a Wouff Hong on the wall????? We'd better watch our operating procedures!!!

Joe gets 'em logged

Don making one of our 149 RTTY contacts... is he focused, or what?

We get fancy and try a 160M dipole

We'll tie antennas to anything! What's that BZZZZZT noise?

Antenna Quiz – what is it?

Our antenna farm

We love our Hex Beam! Thank you Doris!

Our 2M/440 antenna with a 15M dipole on top

Saturday morning and A W8 asks us on 20M, "You're on Catalina Island? What's your elevation?" We close down and start to evacuate.....

We wait to be evacuated – note: our radios are our priority!

The first indication of the "Tsunami" – withdrawal from the shoreline...bay level down about 3 feet

...and it starts its return

Then, the tide goes wa-a-a-a-a-ay out

...and comes back...

...goes out again...

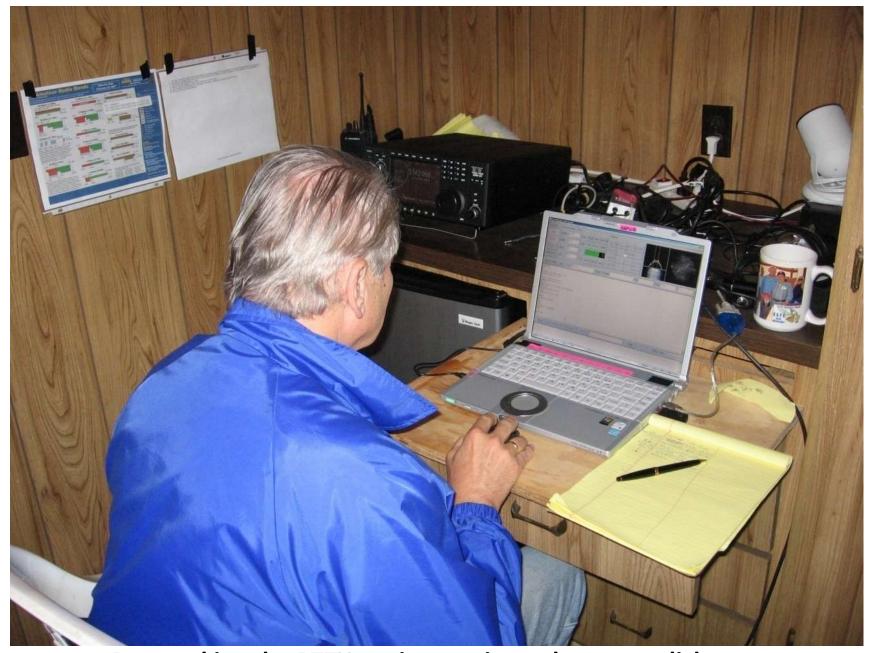

... and comes back again

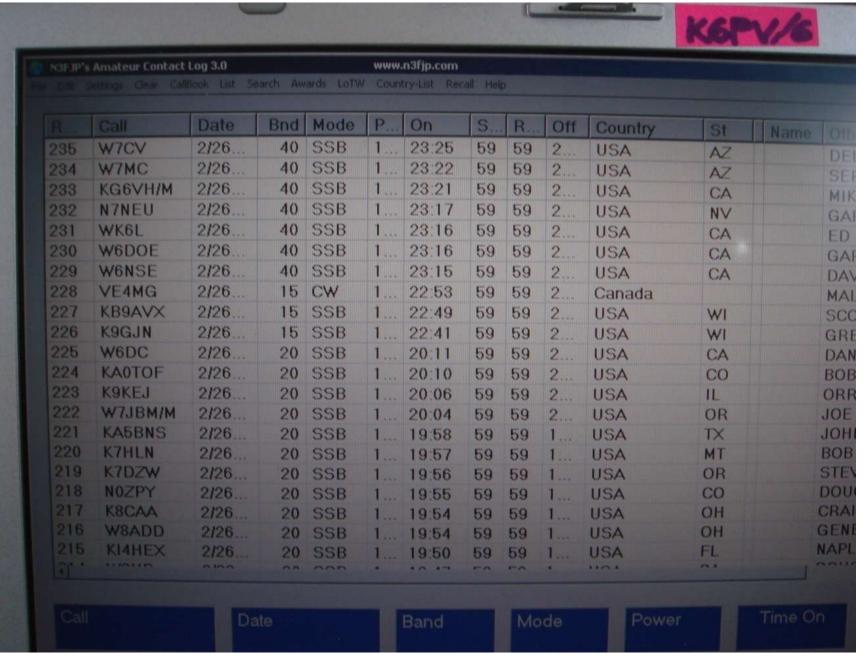

We bravely come down from the hill and return to the radio rooms

But first, we discuss over hot coffee how we narrowly escaped with our lives!

Ray working the RTTY station – using only mouse clicks

Holy Cow – computerized logging! Are we good or what?

Bob burns water...but you gotta have coffee, right?

What... no matches???

Jeff and the 20M "wall"

Bob working 40m SSB...

Joe works a "good ol' boy"

Our traditional Saturday Night dinner out

Ain't it beautiful? (great shot, Bill!)

Sunday morning comes and we start the takedown

Take-down of the fan dipole – looks like Mardi Gras!

Ray gets the easy job . . .

The happy, well-fed K6PV/6 IOTA team waits for the boat back to the mainland

Our Final Results – K6PV/6

Total Contacts: 698(!) Countries: 26

CW: 12 CQ ZONES: 17

RTTY: 149 States: 47

SSB: 537 (- ND, RI, VT)

Not too bad for goofing around on Catalina!

Many thanks to:

Antennas, poles, and fine wines: Mel K6SY and Doris K6KSY

Lots of yummy pre-prepared food: Ginger KG6TAU

Operators: Ray N6HE, Jeff K6JW, Joe NZ6L, Bob AB6SY, Bill

KG6WVF, and Don KD6UMC

Rigs/accessories: Ray N6HE, Jeff K6JW, and Mel K6SY

Pictures/videos: Ray N6HE, Jeff K6JW, Joe NZ6L, Bill KG6WVF,

and Ginger KG6TAU

On-the-air "Tsunami" warning: Wes WD8JTJ

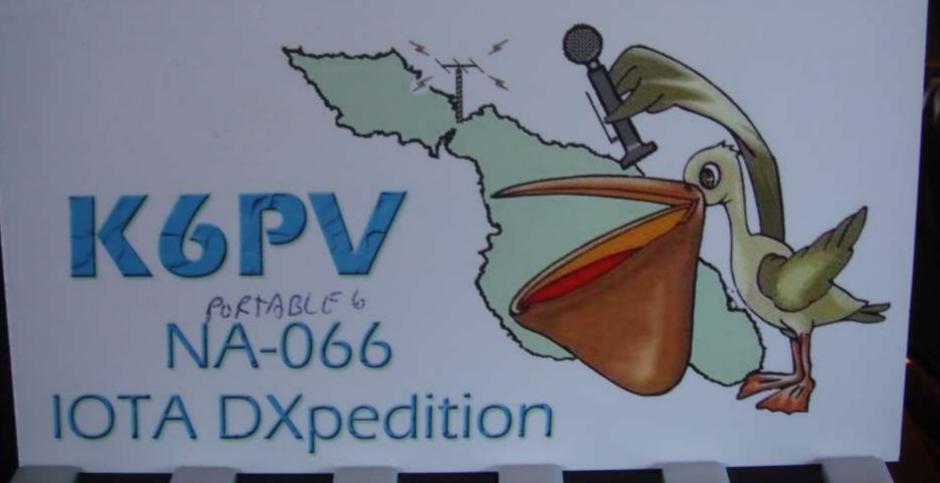

Hospitality: The Banning House on Catalina/Two Harbors

Last-Minute Rescue of Bob-of-the-Missing-Keys: Rowie Wolf

IOTA / Catalina is in the books for 2010

Will YOU be there in 2011?
